The image shows a web browser window on the left and a code editor on the right. The browser window displays a web page with the following structure:

- A header section with the title "Judul".
- A main content area containing two sections:
  - A section with two paragraphs, "Paragraf 1" and "Paragraf 2", and a link labeled "Link".
  - A section with a list of three items: "List 1", "List 2", and "List 3".

The code editor on the right shows the following JavaScript code:

```
1 const nodeH1 = document.getElementById("h1")
2 nodeH1.setAttribute("id", "h1")
3
4 const nodeSelection = document.getElementById("a")
5 const nodeP1 = nodeSelection.querySelector("p")
6 nodeP1.setAttribute("id", "P1")
7
8 const nodeDiv3 = document.getElementById("container2")
9 const nodeUl1 = nodeDiv3.querySelector("ul")
10 nodeUl1.removeAttribute("id")
```

The console at the bottom shows a warning message: "Documents must have <title> element to aid in navigation".
